

TGA SCIENCES

Announces

Microbial Identification Capability

TGA has acquired an Automated Microbial Identification System, the Vitek II Compact. The system is state of the art and can produce accurate and rapid identification of microorganisms. The Vitek II Compact provides high level automation, barcoding and 21 CFR PART 11 Software Compliance. The Automated Identification System is full validated with installation, operation and performance qualification testing.

TGA has fully trained microbiologists that can run your sample for identification in 48 – 72 hour turnaround. Pricing is volume dependent and starts at \$80 per organism. Please contact us for further information.
